

RECONMIND

AI-Powered OSINT Threat Intelligence Report

TARGET	8.8.8.8
SCAN DATE	June 09, 2026 18:27 UTC
REPORT TYPE	Threat Intelligence Assessment
CLASSIFICATION	TLP:CLEAR — CLEAN FOOTPRINT

RISK ASSESSMENT

Prepared by ReconMind AI Engine

TLP:AMBER — Distribution limited to the requesting organisation.

EXECUTIVE SUMMARY

The target IP address 8.8.8.8 is a Google LLC owned IP, with open ports 53 and 443, but no identified vulnerabilities or threats. The IP is used for Google's public DNS service and does not pose a significant risk. No CVEs or credential breaches were found, and the IP does not have a large social footprint.

KEY FINDINGS

- [01] The IP address 8.8.8.8 is owned by Google LLC and is located in Mountain View, United States.
- [02] Open ports 53 and 443 were detected, with port 53 used for DNS services and port 443 used for HTTPS.
- [03] No CVEs or vulnerabilities were found, and the IP does not have any exposed secrets or configurations.

THREATS IDENTIFIED

- [THREAT] None identified
- [THREAT] No known threats or attack vectors were found to be associated with this IP address.
- [THREAT] The IP address is a public DNS service and does not pose a significant risk to users.

RECOMMENDATIONS

- [01] ok Monitor the IP address for any changes in open ports or services.
- [02] ok Use a reputable DNS service, such as Google's public DNS, to reduce the risk of DNS-based attacks.
- [03] ok Implement a security information and event management (SIEM) system to monitor and analyze network traffic.

FULL INTELLIGENCE REPORT

Threat Intelligence Report — 8.8.8.8

Classification: TLP:AMBER | Date: 2026-06-09 | Prepared by: ReconMind AI Engine

Executive Summary

The target IP address 8.8.8.8 is a Google LLC owned IP, with open ports 53 and 443, but no identified vulnerabilities or threats. The IP is used for Google's public DNS service and does not pose a significant risk. The risk score is 0, and the risk level is LOW.

Target Overview

The IP address 8.8.8.8 is owned by Google LLC and is located in Mountain View, United States. The IP is used for Google's public DNS service, which provides a free DNS resolution service to users.

Key Findings

- The IP address 8.8.8.8 is owned by Google LLC and is located in Mountain View, United States.
- Open ports 53 and 443 were detected, with port 53 used for DNS services and port 443 used for HTTPS.
- No CVEs or vulnerabilities were found, and the IP does not have any exposed secrets or configurations.

Threat Analysis

No known threats or attack vectors were found to be associated with this IP address. The IP address is a public DNS service and does not pose a significant risk to users.

Vulnerability Assessment

No CVEs or vulnerabilities were found, and the IP does not have any exposed secrets or configurations.

Digital Footprint Analysis

The IP address does not have a large social footprint, and no exposed credentials or public code were found.

Recommendations

- Monitor the IP address for any changes in open ports or services.
- Use a reputable DNS service, such as Google's public DNS, to reduce the risk of DNS-based attacks.
- Implement a security information and event management (SIEM) system to monitor and analyze network traffic.

Conclusion

The overall risk posture of the target IP address 8.8.8.8 is LOW, and no urgent action is required. However, it is recommended to continue monitoring the IP address for any changes in open ports or services, and to use a reputable DNS service to reduce the risk of DNS-based attacks.
